

CLARITY is Wellpartner's 100% transparent view into the aspects of your 340B program. Covered entities can now access and view data collected from all data sources for the purposes of analysis and reporting.

CLARITY provides opportunities to maximize claims capture, optimize your 340B program, and monitor overall program performance and compliance.

Transparency when it matters most

Pending Claims:

Having a complete view of your pending claims, down to the individual claim detail provides two key benefits; saving money and mitigating risk. You have full control to validate encounter and Rx claims entered into your system. This capability allows you to identify reasons the claim was flagged, ability to accept or reject and ultimately carve in pending claims to drive program value.

Pending Rx refers to "close match" qualified claims. These are claims that could carve-in, but that should be manually reviewed to ensure program integrity. Pending claims is also a tool for covered entities to use to identify incremental adjustments to carve-in methods (e.g. adding a dedicated prescriber list) to optimize claims capture.

Once the pending claim is reviewed the user can approve or reject based on mismatched details.

Audit Support:

Compliance and audit-readiness are critical for a successful 340B program. Be confident in complying with 340B requirements with access to all claims data including patient and prescriber information that can be used for internal auditing and validation of claims qualification. With CLARITY you can generate a self-audit of randomly selected claims based on your own parameters that meet HRSA audit requirements. The ability to save audit results provides for documentation of program integrity.

The Audit Detail screen displays the user-selected criteria along with the status of the request. The result table details current progress and approval/rejection rate for the viewed audit.

Audits can be created based on userspecified parameters such as: date range, entity types, percentage of claims, and selected pharmacies for review.
